

MDOT is preparing for a big road project in 2018 on M-59 from Tipsico Lake Rd to Milford Rd. The project involves mill and overlay on WB M-59, full depth reconstruction on EB M-59, as well as pathways, shoulders, signal upgrades, drainage & signage. The work you are currently seeing out there is advance utility relocation for this project. Consumers Energy has started their relocation and will be relocating for approx. 2 months. Numerous other buried and aerial utilities will be performing relocation over the next several months.

Highland Township has partnered with Marathon Petroleum Company, LP to extend the Township water system to the south side of M-59, a critical element for future development of the Highland Station area. The project will last for the remainder of summer and into the fall. The work will consist of installing a new water main starting from the northwest corner of M-59 and Milford Road, south down the east side of Milford Road, east along East Ruggles Street and north to the dead end of St. John Road. A portion of sidewalk and roadway in this area will be removed and replaced in order to accommodate the underground utility work. This current project will install the water main and a different project will be undertaken later in the year to make the physical lead connections to the affected properties.

While 2-way traffic will be maintained during construction, it goes without saying that delays will occur. Mail service & trash collection will be maintained throughout the construction process. We kindly ask for your patience during this project and please excuse the inconvenience.

If you have any questions and/or concerns during construction, please contact:
